

BERSEY

"Engineered Solutions"

"WASTE TO ENERGY SOLUTIONS" SUSTAINABLE POWER FROM WASTE & BIOMASS

BOILER & HEAT RECOVERY SYSTEMS

- Thermal Oil Heaters
- Water Tube Steam Boilers
- Smoke Tube Boilers
- Waste Heat Recovery Boilers
- Hot Gas Generators
- Hot Water Boilers

PROCESS UNITS

- Pressure Vessels
- Heat Exchangers
- Hot Gas Cyclones
- ESP & Bag Filters

ENGINEERING SERVICES

- Thermal Design
- Piping Design
- Installation & Erection
- EPC - Turnkey Solutions
- Consulting Services

COMBUSTION SYSTEMS

- Moving / Step Grate
- Bubbling Fluidized Bed (BFB)
- Sanderdust Burners
- Granulate Burners

FUEL DIVERSITY

Biomass Fuels

- Debarking & Processing Residues
- Sawdust & Saderdust & Granulates
- Forest Residues
- Wood Chips & Pallets
- Cottonseed Kernels
- Sunflower Seed Husk
- Olive Pomace
- Nut shells & Apricot Kernels

Other Waste Streams

- Industrial Waste
- Mixed Waste Streams
- Municipal Solid Waste (MSW)
- RDF / SRF
- Chicken Litters + Wood Mixes

COMPANY HIGHLIGHTS

Bersey Limited Company, established in **1979**, is an engineering company serving a wide range of **process industries where reliable and efficient heat generation is required**. Founded as a specialized engineering firm, Bersey has continuously expanded its technical capabilities in line with evolving industrial demands and environmental considerations.

Over the years, Bersey has developed strong expertise in the **design and delivery of complete waste & biomass-fired heat generation systems**, fully based on its **own engineering designs**. The company provides customized solutions utilizing **industrial waste, biomass, and process residues**, tailored to the specific requirements of each application.

From the early stages of engineering design to controlled manufacturing and site execution, Bersey's core objective has always been to deliver **engineered solutions** ensuring high efficiency, operational reliability, and long-term performance. All systems are designed and executed in full compliance with **applicable international codes and standards**, with a strong focus on quality, safety, and sustainability.

Backed by its robust engineering infrastructure and decades of accumulated technical know-how, Bersey has progressively evolved into a **trusted and competitive solution partner**, successfully contributing to numerous industrial energy projects across various sectors.

Today, building upon this long-standing experience and engineering maturity, Bersey operates at **EPC level**, delivering **turnkey waste and biomass-based heat generation systems**. The company assumes **single-point responsibility for engineering, procurement, construction, installation, and commissioning**, serving industries such as:

- **Wood and Wood Products**
- **Paper and Pulp**
- **Chemical**
- **Textile**
- **Vegetable Oil**
- **Plastics and Packaging**

OUR MISSION & VISION

We are here **to meet the real needs of our customers and partners** by offering solutions that are reliable, innovative, and of the highest quality. Every step we take is guided by sustainability, continuous improvement, and respect for people, society, and nature.

Our goal is simple: **to build trust and create long-lasting value.**

Our vision is to become a strong brand at both national and international levels by providing **innovative, reliable, and sustainable solutions** that make us the first choice of our customers and partners.

To achieve this, we aim to be an organization that:

- Continuously evolves by closely following technology and innovation,
 - Prioritizes **quality** in every process,
 - Is **environmentally responsible** and contributes to society,
 - Grows and strengthens through employee participation,
- Increases its competitiveness **in the global market.**

OUR ORGANIZATION

We provide services for our customer in our production facilities with 6.500 m2. We do support :

- Engineering Design
- Manufacturing
- Installation & Erection
- Startup & After Sales
- Rewamping, Alterations, Modifications and Repairs

**COMPLETE TURN-KEY EPC SOLUTIONS IN
TURKEY & NEIGHBOURING COUNTRIES.**

SCOPE OF SUPPLY

ENGINEERING & DESIGN

- Feasibility Studies and Fuel Analysis
- Conceptual Plant Design
- Basic Engineering
- Detailed Engineering
- Process Flow Diagrams (PFD)
- Piping & Instrumentation Diagrams (P&ID)
- General Arrangement & Plant Layout
- Thermal Calculations and Performance Guarantees

PROCESS & EQUIPMENT SUPPLY

- Fuel Handling and Feeding Systems
- Combustion Systems (Grate / Fluidized Bed / Dust Burners)
- Waste & Biomass Boilers
- Heat Recovery Systems
- Steam Generation & Superheating Systems
- Thermal Oil Heaters
- Hot Gas Generation
- Combined Energy Generation

GAS CLEANING & TREATMENT SYSTEMS

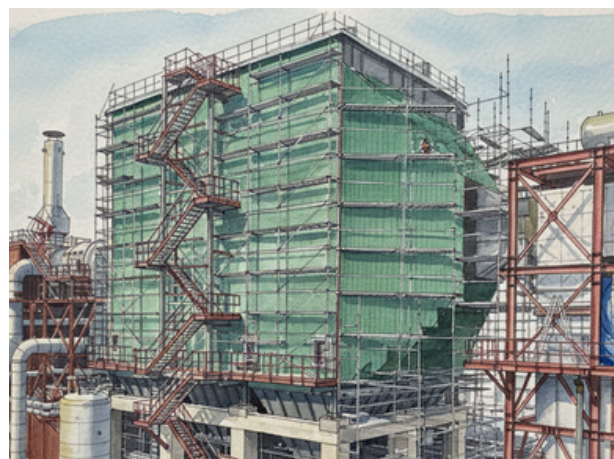

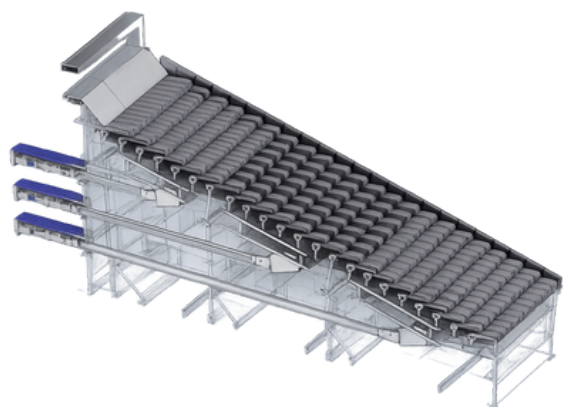

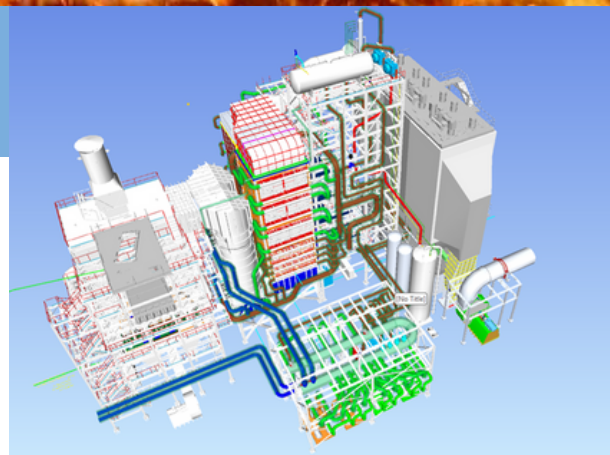

- Cyclones & Multicyclones
- Bag Filters & Electrostatic Filters (ESP)
- Wet Scrubber Systems

MECHANICAL & AUTOMATION SYSTEMS

- Mechanical Equipment and Installation
- Control & Instrumentation
- Safety and Interlock Systems

ERECTION, COMMISSIONING & START-UP

- Erection & Supervision
- Mechanical Completion Support
- Cold and Hot Commissioning
- Performance Testing
- Plant Start-Up and Handover

PRODUCTS

COMBUSTION SYSTEMS

- Moving / Stepgrate Systems
 - Ideal for biomass, RDF, MSW, and mixed waste
 - Robust design for varying fuel quality
 - High availability and low unburned losses
- Sanderdust Burners
- Fluidized Bed Combustion
 - Suitable for biomass and low-calorific fuels
 - Uniform temperature distribution
 - High combustion efficiency and low emissions

WASTE & BIOMASS BOILERS

- Water Tube Boilers
- Saturated and Superheated Steam Boilers
- Thermal Oil Heaters

HEAT RECOVERY & BOILER AUXILIARIES

- Economizers
- Superheaters
- Air Preheaters
- Ash Removal and Handling Systems

FUEL HANDLING SYSTEMS

- Fuel Reception & Storage
- Conveyors and Feeding Systems
- Dosing and Metering Equipment
- Fuel Preparation and Size Reduction

AUXILIARIES & BALANCE OF PLANT EQUIPMENT

- Fans and Blowers
- Pumps and Valves
- Water Treatment Systems
- Compressed Air Systems

KEY PRODUCT FEATURES

- High fuel flexibility
- Modular and scalable design
- Proven technologies
- Compliance with international emission standards

QUALITY & CERTIFICATES

ISO Certifications

- ISO 9001:2015 – for Manufacture and Design of Machines
- ISO 14001:2015 – Environmental Management System
- ISO 45001:2018 – Health and Safety Management System

Product Certifications and Standards

- CE Marking
- ASME U + S + R
- EN 12952 / EN 12953 (European boiler standards)
- PED 2014/68/EU (Pressure Equipment Directive)
- AD 2000 Merkblatt, EN 13445, EN ISO 3834-2
- EAC – (Gost R) for Russian Federation
- Razresheniye Gospromnadzor – Belarus Republic

Quality Control Processes

- Material traceability (certified supply)
- Welding procedures (WPS, PQR)
- Non-destructive testing (RT, UT, PT, MT)
- Pressure and leakage tests

CAPABILITIES

Boiler Pressure Parts Production

- Steam Boiler Drums
- Membrane Walls
- Convection Parts : Evaporators & Economizers
- Pressurized Tanks
- Pipe Bending

Secondary Equipment & Works

- Pump Stations
- Heat Exchangers
- Steel Structures
- Refractory Application
