

STEAM BOILERS

HIGH PRESSURE STEAM FOR INDUSTRIAL PROCESSES
designed for continuous and reliable operation.

Engineering Experience

Founded in 1979, Bersey is an engineering company specialized in industrial heat and energy generation systems. Today, Bersey operates as a turnkey EPC contractor, delivering complete steam boiler plants from engineering to commissioning.

Bersey designs and delivers industrial steam boiler systems tailored to the specific requirements of demanding process industries. With decades of engineering experience, we provide reliable steam generation solutions for continuous operation under challenging conditions.

- Water & Smoke Tube Steam Boilers
- **Fuel Flexible Designs:** Dust & Gas & Oil with burners / Solids with **Grate & Fluidized Bed** Systems
- EPC Capability – Single Responsibility
- International Codes & Standards

"ENGINEERED STEAM FOR DEMANDING INDUSTRIAL PROCESSES"

Steam Boiler Solutions

- Saturated Steam Boilers
- Superheated Steam Boilers
- Waste Heat Boilers
- Superheaters & Economizers
- Deaerator & Water Preparation

Fuel Flexibility by Design

- Biomass (wood chips, bark, sawdust, pellets, agricultural residues)
- Coal & lignite
- Liquid & Gas Fuels
- RDF & industrial waste
- Multi-fuel and co-firing applications

Turnkey EPC Steam Plants

- Fuel handling & feeding systems
- Combustion systems
- Steam boiler & pressure parts
- Flue gas cleaning systems
- Ash handling systems
- Automation & control
- Erection, commissioning & start-up

In House Manufacturing

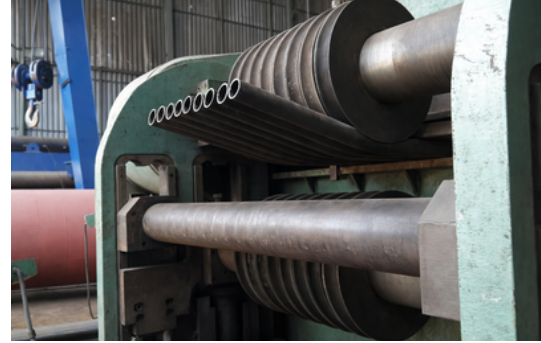

- Full control over quality & manufacturing standards
- Faster delivery with engineering and production
- High flexibility for project-specific designs
- Consistency with international standards

Quality Control Process

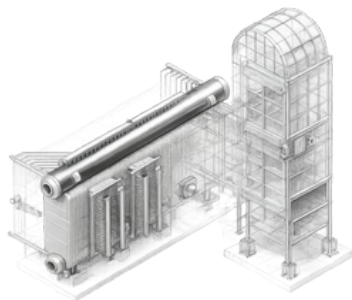

- Material traceability (certified supply)
- Welding procedures (WPS, PQR)
- Non-destructive testing (RT, UT, PT, MT)
- Pressure and leakage tests

Product Certifications and Standards

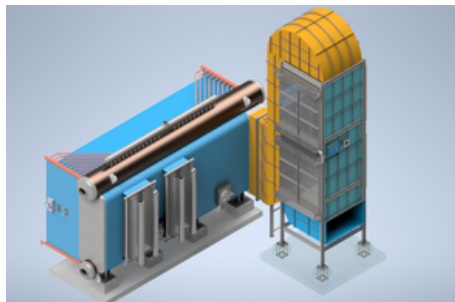

- CE Marking
- ASME U + S + R
- EN 12952 / EN 12953 (European boiler standards)
- PED 2014/68/EU (Pressure Equipment Directive)
- AD 2000 Merkblatt, EN 13445, EN ISO 3834-2
- EAC – (Gost-R) for Russian Federation
- Razresheniye Gospromnadzor for Republic of Belarus

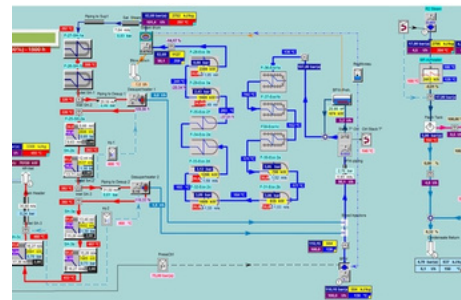

From Design to Application : One Shop Solution
